Is there more than one history of PIV?

- Personal perception of history of PIV according to:
 - scientific career
 - academic education
 - attendance of meetings, conferences
 - visits, personal exchanges
 - area of application
- Geography
 - *Personal observation:*
 - *In Asian countries more use of tracking methods,*
 - *In European countries and US more use of cross correlation technique*
 - *What is the reason?*
- Insufficient and delayed spreading of information in pre-WWW age
- Insufficient and delayed spreading of information in times with lower travel activities (scientific exchange)
- Different scientific communities with low exchange of information
 - PIV development
 - Solid mechanics and Fluid mechanics
 - Particle Image Velocimetry (PIV) and Digital Image Correlation (DIC)
 - PIV application
 - Fluid mechanics - Biology
